Unsheltered
(w/o Youth Count)

Sheltered

14

5

The data excludes the cities of Glendale, Long Beach, and Pasadena.

Unsheltered Persons 74%

Sheltered Persons 26%

The census tracts above were mutually agreed upon by the above jurisdiction and LAHSA. LA Continuum of Care excludes Glendale, Pasadena, and Long Beach COCs

Opt In data may not equal the total for the city council districts, supervisorial districts, service planning areas, or the total Los Angeles Continuum of Care. The totals for these regions are statistical estimates.

*Unsheltered data combines homeless persons found outside with the estimate of persons residing in cars, vans, campers/RVs, tents and other encampments. Demographic survey interviews conducted with 4,946 homeless persons from January to February 2016 determined these estimates. Count does not include persons in domestic violence shelters. The data does not include unaccompanied minors, transitional age youth, and young families experiencing unsheltered homelessness.

**Sheltered homeless persons includes individuals, families, and unaccompanied minors sleeping in emergency shelter, transitional housing, or safe havens that are located within the boundaries of the community on the night of the Homeless Count. Any programs located within this area, including those in using vouchers to stay in motels and hotels will be reflected in the total.

Street Count data includes homeless persons found outside, including persons found residing in cars, vans, campers/RVs, tents and makeshift shelters. The following conversion factors were used to estimate the number of persons living in cars, vans, campers/RVs, tents and makeshift shelters if enumerators encountered homeless persons living in these environments. Individuals: Cars = 1.52, Vans = 1.77, RV's = 2.05, Tents = 1.69 and Makeshift Shelters = 1.92. Family Members: Cars = 2.96, Vans = 3.46, RV's = 3.52, Tents = 3.78 and Makeshift Shelters = 3.69. Demographic survey interviews conducted with 4,808 homeless persons from February to March 2017 determined these conversion factors for the average number of homeless persons in cars, vans, campers/RVs, tents and makeshift shelters.
